Group Sustainability Policy

1. Introduction and Purpose
Billerud’s vision is to challenge conventional packaging for a sustainable future. The company is positioned as a leading, innovative, and sustainable player in the global paper and packaging solutions industry, with a presence and operations around the world.

Billerud’s position presents great opportunities, but is also accompanied by responsibilities. As a leading actor in the industry, Billerud can and shall use its influence to contribute to a sustainable world.

This Group Sustainability Policy (“the Policy”) sets out the overarching ambition regarding the three fundamental pillars of sustainability: environmental, social, and economic aspects. Sustainability shall be fully integrated into Billerud’s business, for which reason several other Group Policies cover sustainability with this Policy as the overarching umbrella, including the Responsible Business Policy, the Operations and Quality Policy, the Finance Policy, and the People Policy. This Policy is supplemented by underlying directives that set out more detailed rules on Billerud’s sustainability work.

2. Scope and Applicability
This Policy applies to Billerud and its subsidiaries (“Billerud” or “the Group”) and covers Billerud’s business activities and operations globally. This Policy applies to everyone who works for or on behalf of Billerud, including board members, employees, interns, and contractors (“Representatives”).

The Policy Owner is responsible for communicating and implementing this Policy. However, all Billerud Representatives are individually responsible for reading, understanding, and following this Policy.

3. Billerud sustainability ambition
Sustainability is a fundamental pillar in the Group Strategy and shall be integrated and continuously improved. Sustainability is integral to Billerud’s working methodology and shall therefore be considered in all strategic decision making.

Billerud’s view of sustainability is based on the premise that everything can potentially be improved. Billerud shall aim to be a responsible and profitable actor in a long-term sustainable society. The Group shall take responsibility in all areas of the value chain, with a focus on three themes:

1. How the Group puts safety first
2. How the Group reduces its climate impact; and
3. How the Group provides material for the future.

The entire organization shall work continuously and actively to improve its sustainability work. Opportunities to exert influence run both backwards and forwards throughout the value chain.
Taking responsibility at every stage – from selecting raw materials to recycling, as well as in developing business solutions and innovations – shall therefore be at the foundation of Billerud’s operations. The Group shall ensure the well-being of both people and planet. The aim is for material and packaging to be as effective and resource-efficient as possible. To ensure this ambition is achieved, specific sustainability targets shall be set and followed up on a regular basis. Targets shall be reviewed every year.

Billerud shares the UN’s belief that inclusive and sustainable economic growth is essential for prosperity and that companies should contribute to positive change. Billerud shall contribute to the global goals, with focus on the largest impact, positive as well as negative, specifically goals 8: decent work and economic growth, 9: industry, innovation and infrastructure, 12: responsible consumption and production, 13: climate action, 14: life below water and 15: life on land. These goals shall be integrated in the sustainability strategy and followed up accordingly.

3.1 Environment and energy
Billerud shall strive to minimize its negative impact on the planet. Abiding by environmental laws and regulations is fundamental. Billerud shall act responsibly and serve as a role model with respect to environmental considerations. Biodiversity in the forest is essential and based on respecting valuable natural environments and understanding that all naturally occurring plants and animals should have conditions that promote life in the forest landscape. Harvesting shall be carried out in accordance with Billerud’s accepted requirements and in compliance with applicable laws and regulations. Billerud shall rely on renewable, climate-smart raw materials for the production of our products. Our mills are energy-intensive and our transports are heavy. Our efforts regarding energy are therefore an integral and important aspect of our sustainability ambition. We shall make informed decisions, strive for continuous improvement, and use our resources as efficiently as possible throughout the value chain. Achieving the goals of the Paris Agreement on Climate Change is crucial for the world and thus for Billerud. Appropriate measures to diminish Billerud’s climate footprint shall be taken throughout the value chain. Billerud shall also contribute to a sustainable future by providing the market with climate smart materials and solutions and shall aim for fossil free production and materials.

3.2 Social
Billerud is committed to respect and internationally promote human rights in our relationships with our employees, suppliers, and other Business Partners. The work on Human Rights is guided by international human rights principles. Billerud supports the UN Guiding Principles on Business and Human Rights, recognizing that while states have a duty to protect Human Rights, companies have a responsibility to respect the same. Billerud bases it work on Human Rights on these principles in order to contribute to a positive impact on local communities where Billerud engages in production. Billerud shall use a structured approach to identify and engage with stakeholders that have an impact on and/or are affected by the Group’s operations. Transparent and responsive dialogue enables us to understand their needs and expectations, in an effort to ensure that Billerud develops in the desired direction.

3.3 Economy
Billerud shall contribute to sustainable economic growth, with sustainable innovation as a strategic tool for development. Increased customer value contributes to economic stability for Billerud and its customers. Financial and treasury-related activities shall be responsible to ensure that the Group meets its financial objectives, while complying with applicable laws and regulations.
Sponsorship at Billerud shall focus on social or environmentally targeted sustainability initiatives, promote diversity (preferably with a focus on children and young people), or be linked to issues and areas of development where the Group’s products (current or future) may have a positive impact. Sponsorship may be local, where we have production facilities, or Group-wide. All sponsorship shall be aimed at underpinning our mission as a challenger to conventional packaging for a sustainable future.

3.4 International guidelines
Billerud shall work actively to comply with internationally recognized guidelines regarding the environment, human rights, working conditions, anti-corruption and business ethics, etc. Billerud shall follow these international principles and guidelines, as a minimum:

- UN Guiding Principles on Business and Human Rights
- The Ten Principles of the UN Global Compact
- The Universal Declaration of Human Rights
- ILO Declaration on Fundamental Principles and Rights at Work
- Rio Declaration on Environment and Development
- United Nations Convention against Corruption
- United Nations Convention on Biological Diversity
- OECD Guidelines for Multinational Enterprises
- OECD Convention on combating bribery of foreign public officials in international business transactions
- The UN Global Goals
- The Science Based Targets Initiative

3.5 Sustainability reporting
Billerud shall report on sustainability according to the Global Reporting Initiative (GRI) framework. Progress shall be transparently documented and publicly available at www.billerud.com and in the Annual and Sustainability Report. Sustainability targets and KPIs shall be set and followed up accordingly. Billerud shall also report to major international reporting schemes in order to demonstrate transparency and advanced engagement, adopt best practices, and follow up on progress.

4. Accountability, monitoring, and compliance
This Group Policy has been approved by the Board of Directors of Billerud. The Policy Owner EVP Group Commercial & Sustainability is responsible for implementing this Group Policy, including:

(I) developing more detailed rules (Directives) for the subject matter, consistent with the purpose and intent of this Group Policy,
(II) ensuring that the Group Policy and underlying Directives are communicated and known to Representatives,
(III) monitoring and following up compliance with the Group Policy and underlying Directives; and
(IV) taking other actions, including corrective and reporting measures necessary to achieve the purpose and intent of this Group Policy.

Billerud’s Representatives are expected to report violations (including suspected violations) of this Group Policy to their immediate supervisor or to the Policy Owner. Anonymous reporting of
wrongdoings (whistleblowing) can be made through Billerud’s Confidential Reporting System (Speak-Up Line). If you have any questions or feedback with respect to this Group Policy, please contact the Policy Owner or Legal & Compliance.
