

Freight Policy

FREIGHT TERMS

All orders shipping from Billerud mills or warehouses in North America are shipped F.O.B. Origin. Title of the products passes to the customer when the carrier is in receipt of the shipment at our dock.

FREIGHT MODE

Billerud reserves the right to select the most cost effective mode and carrier for shipping the products and to charge the customer for freight in addition to the price of the products. The freight charges for products are set forth in the Freight Charge Table published on the Billerud website at www.billerud.com. The freight charges indicated on the order acknowledgment are subject to change if the customer changes the order in any way (e.g. destination, grade, basis weight, quantity, ship mode or requested delivery date).

ORDER EXPEDITING

Order expediting will be subject to transportation availability, and the customer will be responsible for any additional freight expense.

SHIPPING/DELIVERY

Any advance information as to the shipping or delivery date provided in the order acknowledgment is an approximation, based on Billerud's judgment at the time. Orders may be comprised of multiple items, but must ship from a single mill or warehouse to a single destination. Web and sheet products cannot be combined to ship together by intermodal or rail. Rail shipments for sheet orders are not available. Billerud will use commercially reasonable efforts to ship products so they are delivered to the customer's locations within the requested period of delivery dates set forth in the order acknowledgment or, in the event of a delay, as soon as practicable thereafter. Billerud will not be responsible for any detention and demurrage charges arising from or relating to the shipment or delivery of the products.

FREIGHT CHARGES

Freight charges apply to orders that ship from a single shipping point (mill, warehouse, etc.) to a single destination on the same requested delivery date. Any other type of shipping, including additional Out-of-Geography upcharge from Regional Distribution Center originated shipments may apply, subject to RDC origin and ship-to destination. Billerud often publishes anticipated freight charges for Canada and Mexico, but recognize changing regulatory requirements may require changes on short notice.

ADDITIONAL INFORMATION

Orders must be placed with sufficient lead time, as determined by Billerud, to accommodate the requested delivery date utilizing the requested ship mode. For any order that does not meet this criteria, please call Billerud at 800 258 8852 for the freight charges. Refer to the attached Freight Charge Table for the dollar amounts by products, quantity, ship mode, destination state and shipping origin (Manufacturing Mill versus Regional Distribution Center).

Billerud Freight Policy or Freight Charges are subject to change at Billerud's discretion.
