

Narrow Roll Service

Exactly what you need.

Narrow-width rolls. Improved lead times.
Exceptional performance.

Expect the quality and print consistency
you need for your production inkjet presses,
faster and more reliably.

Introducing narrow-width rolls of our most popular Sterling® items, warehoused to improve supply chain lead times for printers with production inkjet presses designed to run coated offset papers.ˆ

Sterling offers exceptional optics, surface smoothness and consistency, paired with excellent roll condition for reliable runnability. A trusted brand for generations, Sterling is OEM recognized for its positive on-press performance and print quality.

The Sterling legacy continues. Building on the best of where we've been and the excitement of where we're going.

ˆIn all printing situations, the quality requirements and productivity expectations vary based upon the complexity of the end-use applications. While many OEM presses recommend coated offset paper, customers should verify product compatibility with the OEM, test substrates prior to use and consider the printing demands of the specific job.
