

BILLERUDKORSNÄS

# Making life easier

HIGH-QUALITY BAG PAPERS FOR DAILY USE

Basix

# For the very best function

Good packaging quality requires a good paper. This, of course, applies to both the most advanced packaging solutions and to all the thousands of bags containing our everyday food or other consumer products.

BillerudKorsnäs Basix is our range of bag papers, offering the best protection for foods or just simply making our lives easier. You can find bags made of our paper in stores all over the world. Let us show you why.

# A complete range that meets your needs

BillerudKorsnäs Basix is the complete paper range for all sorts of consumer bags. We offer products with high and even quality, reliable deliveries and a service-level that meet your expectations.

## **Pure and strong**

BillerudKorsnäs uses long fibres from spruce and pine and short fibres from birch – a perfect mix for strength and performance. Basix complies with hygiene requirements in accordance with FRA and BfR and is approved for direct contact with food.

## **Good printability**

An attractive bag signals tasty contents. It is also the perfect place to emphasize your brand. Basix offers very good printability and colour reproduction that accentuates both text and images.

## **Functionality at every stage**

Choosing the right paper contributes to increased profitability in modern manufacturing processes. The Basix range consists of stiff papers with even quality for effective and functional conversion. You know what you get every time.

## **Grease resistant and protective**

For paper bags that come into close contact with greasy food, such as Danish pastries and French fries, extra surface treatment may be necessary so that the bag retains its freshness. Basix is offered in grease-resistant qualities that protect the fatty food at the same time as the bag retains its attractive appearance.

## **A partner to trust**

BillerudKorsnäs is a dependable and accessible supplier. If a problem should arise, we are at your service. We always provide packaging manufacturers and printers with competent technical support so that our customers will achieve high productivity and a perfect result.

Our products are manufactured with care and consideration for the environment and they contribute to better profitability. BillerudKorsnäs is the natural part in smarter packaging.

## THE NATURAL CHOICE

Every day, in thousands of stores, many types of fresh food are packed in bags made of Basix. Our range is the obvious choice for quality-minded manufacturers.

# The environment's first choice

The environment affects us all and we must choose which way to go for the future. BillerudKorsnäs takes responsibility for sustainable development at every stage. With BillerudKorsnäs Basix, it is easy to make the right choice.

## Caring for the environment

Our activities are characterised by consideration for the environment – from our choice of raw material to the finished product. Our wood comes from carefully controlled, responsible forestry where replanting is mandatory. For every tree felled, between two and four new ones are planted, which has resulted in significant growth of the Swedish forests. For customers who require certified products, BillerudKorsnäs offers qualities marked with the FSC® and PEFC™ traceability certificates.

## Sustainability at every stage

BillerudKorsnäs' mills have almost completely phased out fossil fuels from their

production processes and today their main source of energy is biofuels from the forests. During the production of paper, heat is produced and distributed to the surrounding buildings. Our environmental work has come a long way – but we want to go even further. Consideration for the environment is an ongoing process that never ceases in our activities.

## Reliable deliveries

The Basix range is manufactured at several of our mills, which means that as a customer you can feel secure when you choose BillerudKorsnäs. Contributing to the success of every one of our customers is a matter of course for us at BillerudKorsnäs.

The mark of responsible forestry

Tasty foods require appealing and fresh paper bags. For this, Basix is the optimum range.

BillerudKorsnäs' range of papers for consumer bags
